

Nano is the most advanced spray material enhancement product available on the market today.

The ability to carry materials more efficiently with higher absorption rates means better plant health and higher crop production!

Nano's delivery system is built on revolutionary micelle technology that is able to carry spray material deeply into plant/pest tissue at a rate previously unheard of in the ag community.

**The Most Advanced
Spray Additive Available
Anywhere!**

**Make chemicals work
quickly and effectively
on today's hardest to
kill pests.**

**THE BEST
ENHANCEMENT
PRODUCT ON THE MARKET!**

Companies all over the United States are picking up and carrying our best selling product because it flat-out works. Studies, intensive trials and user feedback have all concluded that our spray additive makes all the difference. In fact, most feedback suggests that we are able to carry chemical at the manufacturer's lowest recommended rate and still have excellent results!

**Use less chemical
and still have
better results!**

**EFFECTIVE
AFFORDABLE
EASY TO USE**

**HIGH COMPATIBILITY
RAINFAST IN MINUTES
HIGHLY CONCENTRATED**

***NANO will become
the most important
spray additive you
buy; it's that good!!!***

General Information

For the enhancement of Ag chemicals and fertilizers through increased availability. NANO makes most foliar products more permeable allowing faster plant uptake. Through the use of micelle technology, NANO pulls itself and foliar mix into the wax of the plant, embedding mix into inner cell structure within seconds greatly increasing foliar mix availability and efficiency.

Recommended Application

2.5 gallons of NANO treats 1,000 gallons of tank mix. Treat tank water with IFC then mix in chemical and/or fertilizer. Compatible with most foliar fed fertilizers other spray materials. For extremely hard water use 5 gallons of Ag-Tec per 1,000 gallons.
