

TRACE™ is physically processed sea water, containing naturally occurring mineral concentrated and excess sodium levels removed. **TRACE™** can be beneficial to all types of plants including trees, vines, small grains, grasses, vegetables, legumes, root crops, etc.

GENERAL USE DIRECTIONS:

Starter: Apply 8-16 ounces per acre in the row on the seed with a buffer. Foliar apply or top-dress 1-4 quarts per acre per application. Can be applied with water or other ProGreen Ag solutions.

When mixing with other solutions, **ALWAYS** mix **TRACE™** into the tank mix first! For more specific crop instructions; contact ProGreen Ag, LLC

Note: **TRACE™** is not compatible with all synthetic NPK solutions. Always jar test before using.

PURE • NATURAL EFFECTIVE

Caution: Keep out of reach of children. May be harmful if swallowed. If ingested, drink several glasses of water and consult a physician immediately.

Manufactured for:
